Products' information based on October, 2025.

1

Add resin and 1-2 drops of color to each mixing palette to create three Sirius colored resins.

2

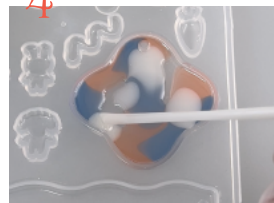

Pour Albireo orange resin into 4 -5 random spots on the mold plate.

3

Do the same with Tanabata blue resin.

4

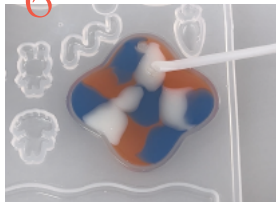

Then, do the same with Milky Way white resin.

5

Add another layer of orange resin on top of the first spots.

6

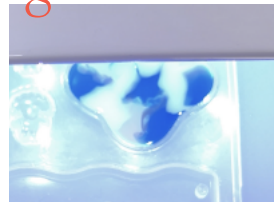

Add more blue resin and white resin on top. Repeat the process until the mold is filled to the top.

7

Gently blend the boundaries between the colors with a mixing stick.

8

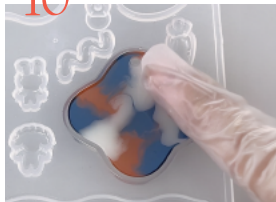

UV-cure 1 minute.

9

Flip and cure 1 minute.

10

If tack, add 30 sec.

11

Once cooled, carefully remove it from the mold.

12

Attach to earring findings with a jump ring.
