Product information as of July 2019

1

Mix LED Curing Resin hard, Jewel Colors and Glitter well.

2

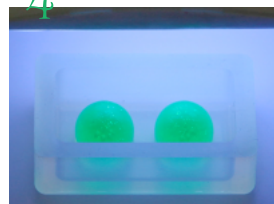

Pour colored resin into the both side by the very limit of the mold.

3

Cure the resin under the UV-LED light.

4

Cure it again from back side.

5

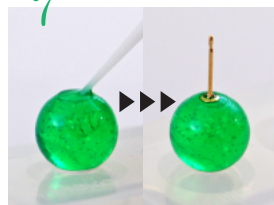

Take it out from the mold after cooling down.

6

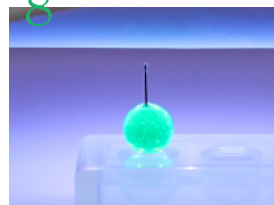

Remove the bur.

7

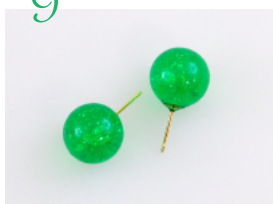

Attach the earring parts with Resin.

8

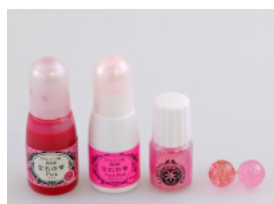

Cure it under the UV-LED Light

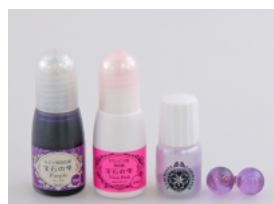

9

Finish the other one.
