

Recipe

Pearl Colored Earing

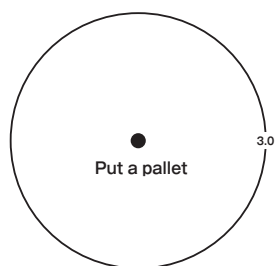

< Material >

- LED Curing Resin "Star Drop" Hard
- Silicone Mold Sphere 12mm
- Jewel Color Pearl Series (of your color choice)
- UV-LED Light
- Earing Parts
- Mixing Stick
- Jewel Color Mixing Palette
- Resin Cleaner

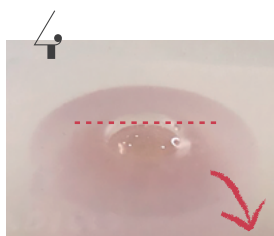

Place the palette on the right circle. Pour resin into the palette as much as it fills the line of the circle.

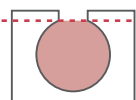

Put 1-2 drops of jewel color and mix it well.

Pour colored resin into the one side of the mold.

Pour resin to just below the spout.

Cure the resin under the UV-LED light for 1 minute and cure it again from back side for 1 minute.

Wait until the mold cools down for 3 minutes.

Pour the Resin cleaner into the gap between resin and mold.

Push the resin out from its back gently and slowly.

Put the resin on the mold, to the flat side be upside.

Attach the earring parts with resin, cure it for 1 minute.

Finish the other one.
