■ How to make

1
Pour resin into the mold, 2mm thick.

2
Put embossed parts on the resin, parts sealed in bottom comes in front.

3
Cure it under UV-LED light for 10 seconds.

4
Pour resin into the palette. Put 1-2 drops of jewel color and mix it well.

5
Pour colored resin into the mold until the resin reaches the very limited to the top. Cure it under UV-LED light for 1 minutes.

6
Wait until the mold cools down. Press the bottom of the mold to push the piece out.
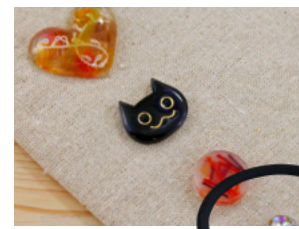

Arrange it as you

Sand the surface.

Put parts of your choice.

Draw the face.

■ How to make it as button parts

7
Turn it back and paste some resin.

8
