- UV-LED handy light
- Mixing palette
- Mixing stick

Products' information above is updated in March 2019.

1

Make 4 different light color resins: blue, green, pink, and purple as shown in the picture.

2

Using a spatula end, place a drop of pink resin in a mold.

3

Drop different colored resin next to the first one. Repeat that until the mold be filled up with resin. Cure in 1 minute under UV-LED light.

4

Make different size and colored dots.

5

Combine dots with clear resin.

6

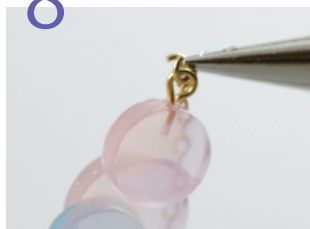

Make a hole on the end dots with a pin vise.

7

Dip a tip of an eye pin in resin, plug it in the hole, and cure it in a minute.

8

Set rings with pliers and the bracelet is done.
