Recipe

Tortoiseshell Ring
Make the tortoiseshell-like color with jewel color easily.

Designed by Kimura Premium

〈 Material 〉
- UV-LED Resin "Star Drop" hard type, better to use soft one for ring
- Jewel color <yellow and brown>

〈 Tool 〉
- UV-LED handy light
- Soft mold <Ring Large>
- Mixing stick
- Mixing palette
- Nipper to remove burr

Products' information above is updated in March 2019.

1
Make yellow color resin and the brown one with UV-LED Hard putting a drop of each liquid color.

2
Take brown resin drip in several places in ring mold.

3
Drip yellow resin in open spaces like photo.

4
Drip the brown and the yellow one randomly like to put in dots.

5
Stir the resin once slowly like drawing one line circle with a stick. Do not mix it.
After that, cure it in 2 minutes.
Take time for dark colored resin.

6
After cooling down, take it out and remove burr with nipper.
