- Tweezers
- Pliers

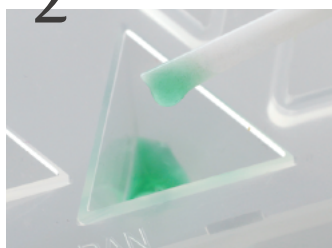

Products' information above is updated in March 2019.

1

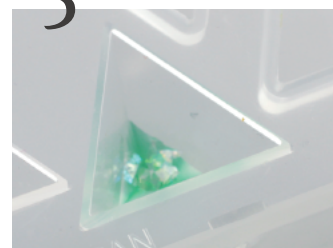

Make cyan color resin and the green one with UV-LED Hard putting a drop of each liquid color.

2

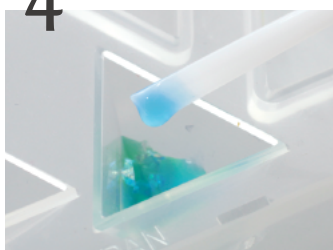

Place a small amount of green resin at the corner of the pyramid.

3

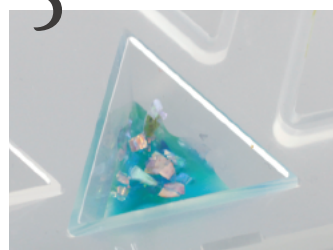

Take the hologram with tweezers and put it in. Do not put too much.

4

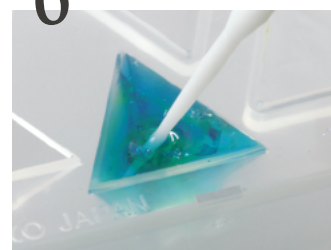

Add cyan resin at the corner.

5

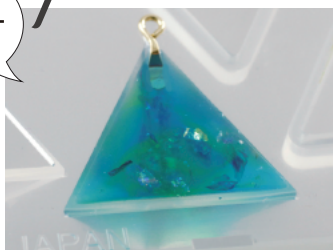

Take the hologram again and put in the resin. Repeat step 2 to 5 until the mold fills up with resin.

6

Stir once in the mold.

7

Set a crank eyebolt on edge of the top referring the photo. Cure it in 1 or 2 minutes.

8

Take it out from the mold and set the chain with accessory parts.
