

Recipe

Ore-like Necklace

Make your favorite shaped ore accessory with your original mold

Designed by Kimura Premium

<Material>

- UV-LED Resin "Star Drop" hard
- White & silver glitters
- Spring clasp
- Chain ● Oval jumprings
- Beads ● Ore

<Tool>

- UV-LED handy light ● Mixing palette
- Mixing stick ● Clear silicone mold making
- Paper box for clear silicone gel ● Scale
- Paper cup ● Vinyl gloves ● Pliers

1 Use a double-sided tape, fasten the stone to the box, with the flat side facing down.

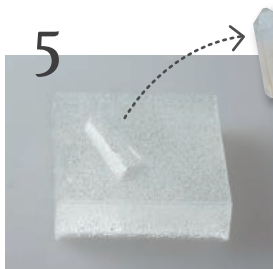

2 Measure A liquid 20g and add B liquid 20g in a cap.

3 Mix A & B well with spatula, and pour the liquid enough to cover the stone.

4 Curing starts in 30 minutes. It takes 24 hours to cure completely.

5 Take the stone out and an original mold is ready.

6 Prepare resin mixed with 2 glitters.

7 Pour the glittered resin at the shaper side while tilting the mold by hand.

8 While leaning, cure it for 30 seconds. Then cure it under the light in a minute.

9 Pour a tiny amount of resin in the mold and cure it in a minute to make a slight surface.

10 Drop resin first. Place one end of chain as zigzag line and cure in a minute.

11 Stay beads with a small amount of resin by curing, repeat that until it is filled up.

12 Take it out from the mold. Chain oval jump ring and spring clasp with pliers for ore-like necklace.
