

Recipe

Rose Petal Button Ring

Embedding flowers in a button and make a lovey ring

Designed by : SiS

【Material】

- UV-LED Resin "Star Drop" hard
- Jewel color white
- Embroidery floss
- Rose petals
- Pad finger ring

【Tool】

- Glue
- Dry sheet
- UV-LED handy light
- Soft mold button
- Weight book
- Mixing stick
- Mixing palette

Refer to the instruction below, make the pressed flowers with rose petals.

Add a layer of resin in mold and cure it in 30 seconds.

Set rose petals.

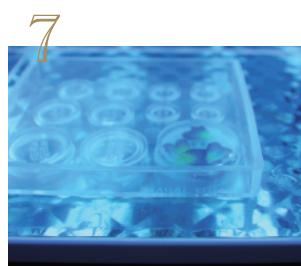

Add resin to cover petals and cure in a minute.

Make white color resin adding 1 - 2 drops of jewel color white.

Add white resin into mold.

Cure in 1minute. Turn it over, cure in a minute again.

After cooling down, take it out. Thread the button with floss. Tie on the back.

Glue the ring on the back side of button. Rose button ring is done.

How to press flowers in a book.

• absorbent paper

Press the flowers between two absorbent pieces of paper, and then flatten with a heavy book. Wait 5 - 7 days for flowers to dry completely.

How to make dried flowers using the microwave.

• Silica gel

Place fresh flowers in a microwave-safe container (face up) and add silica gel in and around the petals until fully covered.

Do not cover the container with plastic wrap.

Put the container in a 500W microwave for 60-90 seconds. Allow to completely dry and remove from the gel gently with tweezers.
